

PROGRAMS & SERVICES

AQUA THERAPY

Aqua Therapy

Paddle boarding and kayaking will be available from initial launch. The facility also has room to accommodate a wade-in style pool, which can provide additional opportunities for aqua therapy and infant survival swimming lessons. Aqua therapy will be provided by certified instructors/therapists.

Aqua therapy can be very beneficial, especially when traditional therapy is not successful. Often children are willing to talk more when they are engaged in physical activity or nature, especially when sensory challenges arise. This form of therapy is also very effective when working with families.

- Certified Instructors/Therapist
- Paddleboarding
- Kayaking
- Highly effecting with children & families
- Second phase: pool for further aqua therapy and infant survival swim lessons
